### WHY SUBSCRIBE?

Ambulance services have not been immune to the high costs of providing healthcare. As a result, fees associated with out-of-hospital care and transportation continue to increase. It is not uncommon for the cost of ambulance transport services to reach \$1,000 or more. Even if you have insurance, full ambulance costs are seldom paid. Most insurance policies only cover 75-80% of the total ambulance fee. Some bills are denied entirely. The subscription program helps to reduce and/or minimize the effects of out-of-pocket expenses associated with ambulance transports.
